

Laid down by 10 Perches to the
 mile and from a scale of 50
 P. to the inch -

Maryland, Somerset County, Sci:

In obedience to the directions of the Commissioners appointed by the Honourable, the General Assembly of Maryland, I have surveyed and laid down a Canal, from Rehoboth at Pocomoke River, to Annapessex River, and find the distance to be 6 1/2 miles; and the level, or the highest part of the lands from high water mark, from each of the said rivers, to be only 7 feet—and the length of Pocomoke River, from Rehoboth to the mouth thereof, to be 10 miles; and from the mouth aforesaid, to Wat's Island, 35 miles; thence to the mouth of Annapessex River, 30 miles—making the whole distance 75 miles. The distance of the Canal is 6 1/2 miles; thence to the mouth of Annapessex River, 7 miles—making the distance from Rehoboth to the mouth of Annapessex River, 13 1/2 miles—and the distance through the Canal is shorter by 5 1/2 miles to Baltimore.

John R. Howland Surveyor Genl.
